NEW YORK
DOWNTOWN

SUSTAINABILITY EFFORTS

LEED GOLD CERTIFICATION BUILDING

Developed by the U.S. Green Building Council, LEED certification is a rating system that evaluates the design, construction, operation and maintenance of buildings to ensure the building operators are environmentally responsible and using resources efficiently.

6K+ MEALS DONATED

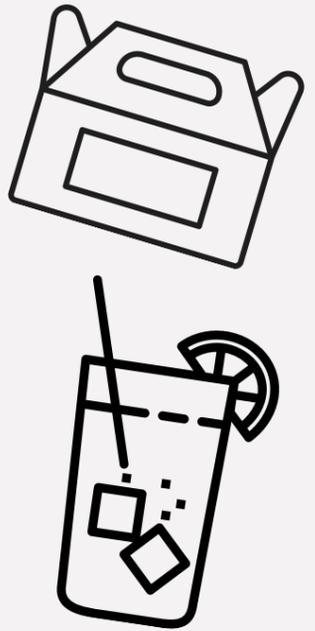

Rethink Food Program

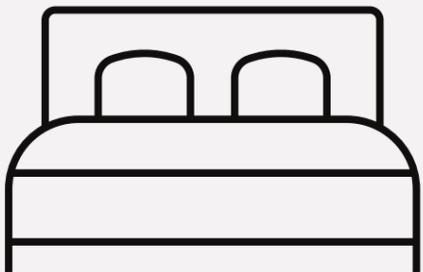

A New York City program that picks up unused, excess food from restaurants, farms, and other food purveyors to repurpose it into delicious and nutritious meals for underserved New Yorkers. The hotel's unused food is donated here.

F&B INITIATIVES

- Restaurant takeout containers are compostable.
- The hotel has eliminated the use of plastic straws; paper straws are available upon request.
- The roof operates as a garden.
- Food waste is composted through a company that brings the compost directly to a waste management center, further reducing waste.

DEDICATED IN-SUITE INITIATIVES

- Lights turn off after 15 minutes of no activity in the suite, reducing electric waste.
- Temperature in-suite fluctuates +/- 4 degrees when motion is not detected so energy can be saved.
- Nespresso Pods are recycled.
- Toilets have dual-flush capabilities, which allow for the appropriate amount of water when flushing.
- Showerheads in each guest suite monitor water usage, ensuring reduced water waste.

CLEAN THE WORLD

The hotel recycles plastic bottles and soap from all of our bathroom amenities.

3 PUBLIC SPACE EFFORTS

- Two water fountains with bottle dispensers (that also count how many plastic water bottles are saved by using the fountain).
- Motion-sensored lights in public space to save electricity.
- LED lights throughout, which use 75% less power than regular bulbs.

WATER FILTRATION SYSTEMS IN-SUITE

Rocean water filtration systems are present in all suites, which eliminates single-use plastic water bottles.

UPCOMING

Bulk amenities in all suites to reduce waste and plastic usage.

COMMITMENT TO CHANGE

Here at Conrad New York Downtown, we are committed to being hospitality leaders who bring forth bold and impactful green initiatives. We pride ourselves on not only reducing our carbon footprint but also participating in active change.
